This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

THE following work was commenced in October, 1867, the author, a graduate of the U. S. Military Academy, feeling the injustice of having the services of graduates, alone, made a matter of history, while ignoring the deeds of those who, equally with themselves, fought to sustain the Government in its hour of trial. This record, it was considered, would be of more interest to the officer's family and friends than to himself, and the interest therein would increase as time separated the actor from events so pregnant with glorious deeds, and would console him with the reflection that in dying, he had something more to leave behind him, for his children's children to delight in, than the casualties embraced in the last Army Register. No hesitation was felt in asking each officer for his record, as it was thought that the furnishing of the data of public duties performed, known only to the officer himself, would not be trespassing upon his modesty. Indulgence is claimed for such variations and omissions as may be observed, it having been found impossible to modify, the original records furnished, or — in all cases — to get correct

Hosted by Google

data. A second volume is contemplated should a sufficient number of records be received. The author regrets that he has been unable to obtain those of a large number of officers who were killed or died in service, but trusts that their friends will now aid him in doing so.

To the Adjutant-General of the Army, for forwarding letters which otherwise could never have reached their destination, — to the Surgeon-General, for his uniform courtesy in furnishing records from his office, — and to all who have in any way aided and encouraged the author in his labor, he desires to express the warmest thanks. Hoping allowances will be made for any inaccuracies which may have occurred,

I remain, respectfully,

THE AUTHOR.

FORT WADSWORTH, NEW-YORK HARBOR, *September*, 1869.
